SUMMARY

Software QA Engineer with 2+ years of experience testing Java Spring Boot applications, with hands-on expertise in test automation, API testing, regression testing, and CI/CD integration. Experienced in validating backend services, collaborating with Java developers in Agile environments, and maintaining full defect lifecycle documentation. Published research in adversarial ML. Strong English communicator (C2 Level), available to work US time zones.

WORK EXPERIENCE

Therap(BD) Ltd.

Dhaka, Bangladesh

Software Engineer, QA

April 2025 – Present

Associate Software Engineer, QA

February 2024 – March 2025

- Testing and validating Java Spring Boot-based backend services, including API-level and integration testing across microservices.
- Performing thorough manual testing of web applications to identify UI, functional, and edge-case defects.
- Developing and maintaining automated test scripts using Playwright.
- Documenting and tracking defects through their complete lifecycle.
- Collaborating with developers to reproduce issues and verify fixes.
- Training junior members of the team.
- Validating software features against healthcare compliance requirements, including HIPAA security and privacy rules.
- Participating in HIPAA training and applying data protection best practices to safeguard PHI.

SKILLS

Web & Mobile Testing:	Manual Testing, Automation, API Testing, Regression, Integration, E2E Testing, SDLC, STLC, Risk-Based Testing
Tools:	Playwright, Selenium, JUnit, Postman, Newman, Jira, Splunk
Programming Languages:	Java, Python, C++, JavaScript
Libraries:	Node.js, React, TensorFlow, Pandas
Databases:	MySQL, MongoDB, Oracle
CI/CD & VCS:	Git, Jenkins, GitHub Actions
Languages:	Bangla (native), English (C2 Level)

PUBLICATIONS

Shaikh Nahian and Mohammed Moshiul Hoque (2025). “Deep Autoencoder Based Protection for Malware Detection Models from Adversarially Perturbed Data”. Presented at 4th IEEE International Conference on Signal Processing, Information, Communication and Systems (SPICSCON) 2025; Proceedings accepted and forthcoming in IEEE Xplore.

EDUCATION

Chittagong University of Engineering & Technology	2018 - 2023
– BSc in Computer Science and Engineering (GPA: 3.15/4.0)	
Notre Dame College	2015 - 2017
– HSC (GPA: 5.00/5.00)	
Motijheel Ideal School and College	2013 - 2015
– SSC (GPA: 5.00/5.00)	

PROJECTS

- **LogShark: Log Analysis & Monitoring Tool** *GeminiAPI, LangChain, WebSocket, NodeJS* 
 - Developed a tool to analyze uploaded log files or stream live logs over SSH.
 - Enabled natural-language queries using LLMs for real-time insights to assist testers.
- **MetaTestLab** *Python, PyTest, Custom MT framework* 
 - Developed a metamorphic testing framework for oracle-free testing of black-box systems, with emphasis on ML models.
 - Designed and evaluated invariance, change-sensitive, and purity-based metamorphic relations to detect faults.
- **HR Management System Test Automation Suite** *Playwright, Javascript, POM* 
 - Built a production-ready Playwright test framework for OrangeHRM using Page Objects, fixtures, and logging.
 - Created data-driven test workflow with Excel integration and practical handling of flaky UI and validation issues in CI.
 - Designed test cases modeled on patterns from Java Spring Boot application testing at Therap.
- **Deep Autoencoder-Based Protection for Malware Detection Models from Adversarially Perturbed Data** *TensorFlow, Keras, Pandas, ART* 
 - Built an autoencoder-based defense for ML/DL malware classifiers.
 - Addressed evasion attacks created from adversarial malware samples.
- **PLDC WebApp** *ReactJs, FastAPI, TensorFlow, CNN* 
 - Developed a CNN-based potato leaf disease classifier and deployed it as a web application.
 - Implemented ReactJS and FastAPI for real-time image-based diagnosis.

NON-ACADEMIC SERVICES

Vice President, CUET Debating Society	June 2022 – June 2023
Assistant General Secretary, CUET Computer Club	August 2022 – August 2023
